DragonHacks Hackathon, Grand Prize Winner, Drexel University, 2018

Computer Skills

Languages: JavaScript, Python, HTML, CSS, Java, C, C++, C#, SQL
Skills: Web Design, React, VueJS, Redux, Unix, Database Design, Object Orientation, GIT, Software Design

Relevant Coursework

Human-Centered Design Process & Methods
System Architecture
Developing User Interfaces
Software Design
Scientific Data Analysis

Artificial Intelligence
Database Systems
Advanced Programming Techniques
Mathematical Foundations in CS
Systems Programming

Experience

Amino Payments
Software Developer, Co-op
Philadelphia, PA
April 2018 to September 2018

- Created various components for a React application that displays companies' advertisement expenditures
- Developed internal tools to improve continuous integration in startup environment
- Setup an end-to-end automated browser testing framework for improved quality assurance

Bentley Systems
Software Developer, Co-op
Philadelphia, PA
April 2017 to September 2017

- Created various tools and scripts to better validate schema xml files in the Bentley EObjects domain
- Assisted in fixing bugs and improving desktop application for viewing schemas
- Set up a unit testing framework for web application prototype for viewing schemas

OSISoft
Software Developer, Co-op
Philadelphia, PA
March 2016 to September 2016

- Automated manual test cases for web application, Pi Coresight
- Assisted in fixing bugs and improving software with scrum methodology
- Implemented a production-quality color picker for upcoming release

Leadership and Activities

- Upsilon Pi Epsilon Honors Society, Webmaster, 2018 to Present
- The Seven Band, Keyboardist, 2018 to Present
